

IDENTITY AND PROVENANCE RECORD

Sky Hook Digital: patient-specific digital orthopedic support system

Version 1.0 of the AXIS record for Sky Hook Digital, a patient-specific extraoral orthopedic support system developed from non-contact facial surface acquisition, CAD-based design, additive manufacturing, and a hybrid resin-metal framework. The record links the device to its published JDHAB article and supporting technical evidence. It documents identity, provenance, file integrity, access conditions, and documentary continuity; it does not constitute regulatory approval or independent validation of clinical effectiveness.

UTC event log

CORRECTED

Scientific object identity, associated article metadata, institutional roles, and canonical evidence filenames were normalized. All retained files were verified against their existing SHA-256 checksums. Scientific content and Passport identifier were not changed.

2026-07-12T16:41:12
UTC event log

METADATA PREPARED

Restricted 3D and patient-specific source files were removed from the Sky Hook asset record before final public acceptance.
